

Stainless Steel 304 Fasteners

Chhaged Steel & Alloys are aggressively venturing into exporting of our products to various countries. **304 stainless steel** is one of the most widely and commonly used stainless steel grades. It is also known as the 18 - 8 chromium nickel grade by the SS 304 Nut Bolt Manufacturer. Besides being versatile, type 304 stainless steel fasteners offer an economical alternative to other stainless steel. This grade of fasteners is economical on account of the stainless steel having good corrosion resistance properties towards a broad spectrum of general and localized corrosive media.

Along with resisting atmospheric corrosion, SS 304 Bolts And Nuts have good resistance in moderately oxidizing and reducing environments. The SS 304 Bolt has excellent resistance to intergranular corrosion in its as welded condition. Due to the 304 Stainless Steel Nuts being good at resisting these contaminants or corrodents, they have a long work or service life. Therefore they are not required to be changed at short intervals.

Other than being recognized for its corrosion resistance properties, the SS 304 Fasteners have good toughness and hardness properties. In fact the type 304 stainless steel fasteners, exhibit excellent toughness and strength at cryogenic temperatures. These properties are inherited by the SS 304 Hex Bolts because of the chromium content in the alloy. We are well recognised for being one of the best SS 304 Fasteners Manufacturers In India.

304 Stainless Steel Fasteners, 304 Stainless Steel Studs Manufacturers, 304 Stainless Steel Threaded Rod Suppliers, 304 Stainless Steel Countersunk Washer Exporters 304 Stainless Steel Stockist.

304 Stainless Steel Fasteners in India, 304 Stainless Steel Pan Head Hex Bolt Manufacturers in India, 304 Stainless Steel U Bolts Screws Suppliers in India, 304 Stainless Steel Countersunk Washer Exporters in India, 304 Stainless Steel Stockist in India.
