

304H Stainless Steel Sheets & Plates

Chhaged Steel & Alloys are aggressively venturing into exporting of our products to various countries. **A240 304H Stainless Steel Sheet** is one of the most elementary forms used in metalworking and it can be bent or cut into a variety of shapes. It is useful in many applications such as automobile and truck bodies, medical tables, roofs for buildings, airplane fuselages, and wings. A240 gr 304H sheets is an austenitic chromium-nickel steel alloy that delivers greater carbon content and helps to increase its tensile and yield strength. It has higher content which makes it more suitable for elevated temperatures are present. They are also used in oil refining, gas and chemical industry, industrial boilers, pipelines, condensers, pressure vessels, and heat exchangers.

304H Stainless Plate is made by flattening multiple steel layers together into one by forming a plate of steel, it can be customarily cut and welded to develop a more elaborate product. It has good resistance to atmospheric corrosion, foods and beverages, and too many organic and inorganic chemicals in moderately oxidizing to moderately reducing environments. a240 gr 304h strip has an excellent combination of corrosion resistance and formability and serves many applications and markets They are used in furniture border, insulation cladding. A240 tp 304h foil useful in the application of spring for electronic and precision equipment. They are very thin sheets of metal usually made by rolling or hammering. **Stainless steel foils** usually get bend under their weight and can be torn easily.
