

Aluminum 6061 Alloy Pipes

Chhajed Steel & Alloys are aggressively venturing into exporting of our products to various countries.

Pure Aluminium as well as alloyed Aluminium is used for making the aluminum pipes as well. The 6061 pipes are made from a manganese and silicon alloy of Aluminium. In **6061 Aluminum Pipe** there are different schedules of the pipes that indicate the wall thickness and the pressure classes. It is a variation of Aluminium pipe grades. The 6061 T6 Schedule 80 Aluminium Pipe is a medium pressure class and it could withstand considerable pressure in domestic applications. The material has good corrosion resistance. The **6061-T6 Aluminium Structural Pipe** is used in structural applications which require high strength.

Aluminium is fragile, but the additions and the heat treatments make it medium to high strength which then could be used in applications. The **Aluminium Alloy 6061 ERW Pipes** are relatively easy to weld with, so the applications where welding is required could use these pipes. The **Aluminium 6061-T6 Pipe** is a medium to high strength material that has a good toughness compared to other grades. The 6061 Aluminium Thin Wall Pipe is used in applications where the finish needs to be good looking. Almost all Aluminium alloy pipe materials have a good finish and they look better. Aluminium pipes are also used in aesthetic applications.

Aluminium 6061 Alloy Pipes, Aluminium 6061 Alloy Welded Rectangular Pipes Manufacturers, Aluminium 6061 Alloy Seamless Pipe Suppliers, Aluminium 6061 Alloy Marine Exhaust Pipe Exporters Aluminium 6061 Alloy Polished Decorative Pipe Stockist.

Aluminium 6061 Alloy Square Pipe in India, Aluminium 6061 Alloy Pipes Manufacturers in India, Aluminium 6061 Alloy Rectangular Pipe Suppliers in India, Aluminium 6061 Alloy Hydraulic Pipe Exporters in India, Aluminium 6061 Alloy ERW Pipes Stockist in India.
