

Aluminum 6063 Alloy Pipes

Chhaged Steel & Alloys are aggressively venturing into exporting of our products to various countries. **6063-T6 Aluminum Pipe** used to improve the strength and corrosion resistance properties of aluminum. It is one of the magnesium silicon alloys of aluminum. This type of material could be heat treated after production to improve the strength and be hardened. The 6063-T5 Aluminum Pipe are different schedules and classes to denote different mechanical properties of the material. It has good tensile strength and good elongation of 8%. The **6063 Schedule 40 Aluminum Pipe** governs the wall thickness of pipes with nominal size from 1.25 inches to 6 inches.

The fine grain structure of the material also makes it possible for fine anodizing. The **Aluminum 6063 Welded Pipe** is stronger and could also be welded upon. The use of t4, t5, t6 types of the material are seen in different industries. The 6063 classes are welded with tungsten inert gas welding. The 6063 T4 Aluminum Pipe is considered the architectural aluminum grade because of its use in the architectural industries in the most cases. The **6063-T6 Aluminum Hollow Pipes** are one of the most used types of pipe but there are other types. The shapes also differ. The **Aluminum 6063-T6 Round Pipe** applications of this grade include window frames, roofs, door frames, sign frames.

Aluminium 6063 Alloy Pipes, Aluminium 6063 Alloy Welded Rectangular Pipes Manufacturers, Aluminium 6063 Alloy Seamless Pipe Suppliers, Aluminium 6063 Alloy Marine Exhaust Pipe Exporters Aluminium 6063 Alloy Polished Decorative Pipe Stockist.

Aluminium 6063 Alloy Square Pipe in India, Aluminium 6063 Alloy Pipes Manufacturers in India, Aluminium 6063 Alloy Rectangular Pipe Suppliers in India, Aluminium 6063 Alloy Hydraulic Pipe Exporters in India, Aluminium 6063 Alloy ERW Pipes Stockist in India.

Chhaged Steel & Alloy Pvt Ltd.

Office No 7, 42/46, Mughbat Lane, Shantaram Chawl, Girgaum, Mumbai - 400 004.
