

31 Alloy Pipes

Chhajed Steel & Alloys are aggressively venturing into exporting of our products to various countries. **Alloy 31 N08031 Electro polished Pipes** has strong resistance to both corrosion and erosion corrosion, especially in phosphoric acid containing environments. The Nicrofer 3127 hMo UNS S08031 Pipe demonstrates excellent resistance to corrosion in not only sulfuric acid, but also in reducing and oxidizing media. **ASTM B626 UNS S08031 Polished Pipes** are used in applications such as pulp and paper industry, sea water heat exchangers, flue gas desulphurization - FGD - systems, petroleum production and refining industry as well as in mining industry, ore processing etc.

Typically **alloy grade uns n08031 seamless pipe** is known to have a PREN value of ≥ 48 . A higher PREN value or pitting resistance equivalent number indicates that the resistance to pitting corrosion of that particular alloy grade is high. The alloy 31 seamless pipe can be used in settings where the temperature ranges between -196°C to 550°C. Additionally, since the alloy 31 welded pipe has very good weldability properties, it can be used for welding based applications as well.

Alloy 31 Pipes are very superior to alloy 625 pipe & other nickel alloy pipe and suitable for transporting extremely corrosive liquids. When the Alloy 31 pipe used in the presence of boiling 67% nitric acid, the alloy has excellent resistance to both general and localized corrosion as well. It is used in Chloridoxide bleaching plants in paper production. Alloy 1.4562 welded pipes also has the ability to resist corrosion even in alkaline and acid halide containing media.

31 Alloy Pipes, 31 Alloy Welded Rectangular Pipes Manufacturers, 31 Alloy Seamless Pipe Suppliers, 31 Alloy Marine Exhaust Pipe Exporters 31 Alloy Polished Decorative Pipe Stockists.

31 Alloy Square Pipe in India, 31 Alloy Pipes Manufacturers in India, 31 Alloy Rectangular Pipe Suppliers in India, 31 Alloy Hydraulic Pipe Exporters in India, 31 Alloy ERW Pipes Stockists in India.
