

Alloy Steel Tubes

Chhajed Steel & Alloys are aggressively venturing into exporting of our products to various countries. It's an alloy steel tube suppliers and manufacturers in India, which are being designed as per quality standard of national and international standard. Our specialist procuring representative who examines the quality of steel according to industrial standards. Alloy steel Tube is a metal alloy of carbon, iron, and high amounts of other elements. The other elements present in its alloy steel include silicon, manganese, nickel, titanium, chromium, and copper. These elements are called alloy elements because it is mixed together to form an alloy. And these elements are added to improve the properties of steel.

Alloy steel tubes are being used for significant applications such as boiler, oil & gas, solar power plants, petrochemicals, nuclear, defense, aerospace, refineries, atomic energy, thermal, and so on. Before you buy do not forget to compare price and quality of Alloy Steel Tube suppliers.
