

Aluminum Alloy Round Bars

Chhaged Steel & Alloys are aggressively venturing into exporting of our products to various countries. **Aluminum Round Bar** providing the best quality of the material we conduct several quality tests on our products such as Mechanical Testing, Micro and Macro Test, Inter-granular Corrosion (IGC) Test, Positive Material Identification Testing, etc. They are less corrosion-resistant than pure aluminum, except for marine magnesium-aluminum alloys.

Aluminum Round Bar is chemically, physically, and mechanically is similar to steel, brass, copper, zinc, lead, or titanium. They naturally produce a protective thin oxide coating that keeps it from making further contact with the environment. Different types of surface treatment such as anodizing, painting, or lacquering can further improve its property. It is perfect for framing, store fixtures, displays, glass/mirror projects.

An **Aluminum Angle Bar** is frequently installed along with the edges of beams and other platforms that may not have enough capacity to carry the expected load. A 7075-t6 aluminum round bar has mechanical properties and discloses good high strength, toughness, ductility, and good resistance to fatigue.

Aluminum 6061 bar has good mechanical properties, exhibits good weldability and it is very commonly extruded. **Aluminum 6061 Flat Bar** thinner sections can be welded by using the gas tungsten arc welding technique and has excellent weldability.

Aluminum Alloy Round Bars, Aluminum Alloy Round Bars Manufacturers, Aluminum Alloy Round Bars Suppliers, Aluminum Alloy Round Bars Exporters Aluminum Alloy Stockists.

Aluminum Alloy Round Bars in India, Aluminum Alloy Round Bars Manufacturers in India, Aluminum Alloy Round Bars Suppliers in India, Aluminum Alloy Round Bars Exporters in India, Aluminum Alloy Stockists in India.
