

API 5L X60 Pipes

Chhajed Steel & Alloys are aggressively venturing into exporting of our products to various countries. The **API 5L X60 PSL2 Welded Pipe** is known to offer better performance in comparison to PSL1. This is because in comparison to PSL1, the API 5L X60 PSL 2 has a requirement for a much stricter inspection. In addition to being strictly inspected in comparison to the API 5L X60 PSL1 Line Pipe, PSL2 pipes of this particular standard need to adhere strictly to both, the chemical composition as well as the mechanical performance requirements. The specified API 5L Grade X60 Steel Pipe Line manufacture needs to also include the hydraulic pressure test, and standards are not permitted to non-destructive generation of hydraulic pressure. It is important to note that a non-destructive inspection is not required for API 5L X60 PSL1, while each PSL2 API 5L X60 Pipe needs to mandatorily go through a non-destructive examination one by one.

In fact, the **API 5L X60 PSL2 ERW pipes** are used in the above mentioned industrial sectors in the transportation of various media. The properties of these pipes along with stringent quality checks conducted in our factory make the API 5L X60 ERW Pipe well suited in being used for applications such as the conveyance of various mediums such as gas, water, and oil from the site to refineries.

API 5L X60 Pipes, API 5L X60 Welded Rectangular Pipes Manufacturers, API 5L X60 Seamless Pipe Suppliers, API 5L X60 Marine Exhaust Pipe Exporters API 5L X60 Polished Decorative Pipe Stockist.

API 5L X60 Square Pipe in India, API 5L X60 Pipes Manufacturers in India, API 5L X60 Rectangular Pipe Suppliers in India, API 5L X60 Hydraulic Pipe Exporters in India, API 5L X60 ERW Pipes Stockist in India
