

ASTM A285 Carbon Steel Gr C Sheets & Plates

Chhaged Steel & Alloys are aggressively venturing into exporting of our products to various countries. **ASTM A283 Grade C** used for general purpose structural applications of medium strength (60 KSI tensile) requirement. **ASTM A283 Grade C Carbon Steel Plate** can be welded by all conventional methods. Its heat treatment consists of normalizing at 1650 F and slow furnace cool. ASTM A283 Grade A structural steel plates it has the lowest strength and highest ductility compared to the other grade of ASTM A283 steel. There is a low & intermediate tensile strength hot Rolled steel for general intermediate strength applications. ASTM A283 Grade B is made by one or more of the following processes such as the electric furnace, open hearth, and basic oxygen. They enhanced shall conform to the requirements of the current specification a6/a6m.

ASTM A283 Grade A structural steel plates have the lowest strength and highest ductility compared to the other grade of ASTM A283 steel and are the lowest strength and highest ductility compared to the other grade of ASTM A283 steel. ASTM A283 Grade D boiler steel is relatively higher in strength than A283 GRC. It is low & intermediate tensile strength hot rolled steel in the form of plates for general intermediate strength applications.
