

Chrome moly Steel Pipes

Chhaged Steel & Alloys are aggressively venturing into exporting of our products to various countries. The grades differ and the mechanical properties differ as well. Each grade has a different chemical composition and that corresponds to the mechanical properties. The different grades also govern the dimensions and wall thicknesses of the pipes. The **1 1/4 Cr 1/2 Mo Pipe** is an example of different classes with different diameters. The benefits of **Chrome Piping** are mainly the cost effectiveness in a long run, corrosion resistance, high temperature resistance and the high tensile strength. The applications range greatly but include power plant, petro chemical plants, oil fields, oil and gas industries and refineries.

They are also used to transport hot fluids from one location to the other. The chromium content is sometimes denoted by a number in the naming of these grades. The **Chrome Moly Pipe** is cost effective and has a high tensile strength. They can perform well under high temperatures with excellent corrosion resistance. The electric resistance welded Chrome Moly Steel ERW Pipe is easy to weld with and has a high strength compared to the seamless ones. The Chrome Moly Steel Pipes can be produced under fully annealed or isothermal annealed conditions depending on the grades and classes.

Chrome Moly Steel Pipes, Chrome Moly Steel Welded Rectangular Pipes Manufacturers, Chrome Moly Steel Seamless Pipe Suppliers, Chrome Moly Steel Marine Exhaust Pipe Exporters Chrome Moly Steel Polished Decorative Pipe Stockist.

Chrome Moly Steel Square Pipe in India, Chrome Moly Steel Pipes Manufacturers in India, Chrome Moly Steel Rectangular Pipe Suppliers in India, Chrome Moly Steel Hydraulic Pipe Exporters in India, Chrome Moly Steel ERW Pipes Stockist in India.
