

EN 10296-2 Stainless Steel Pipes

Chhaged Steel & Alloys are aggressively venturing into exporting of our products to various countries. Welded circular steel tubes are generally less expensive due to the simpler manufacturing process. It is easily available in long continuous lengths. It is useful for automotive industry, architectural applications, pharmaceutical industry, food and beverage industry and marine industry. **DIN EN 10296-2** is a heat resisting steel for circular welded tubes for mechanical and general engineering purposes. Since it has good strength at this temperature and is especially resistant to short and long term exposure to hot gases and combustion products at temperature higher than 500 deg C. It is a solid solution strengthened alloy steels. It is used over a certain broad temperature ranges and it is usually strengthened by hard mechanism of heat treatment, solid solution and precipitation.

EN 10296-2 Stainless Steel Pipes, EN 10296-2 Stainless Steel Welded Rectangular Pipes Manufacturers, EN 10296-2 Stainless Steel Seamless Pipe Suppliers, EN 10296-2 Stainless Steel Marine Exhaust Pipe Exporters EN 10296-2 Stainless Steel Polished Decorative Pipe Stockists.
