

EN 10216-5 Stainless Steel Pipes

Chhaged Steel & Alloys are aggressively venturing into exporting of our products to various countries. **EN 10216-5 Stainless Steel Seamless Tubes** is considered for pressure purposes. This feature of the stainless steel seamless tube is important because this type of tube is constantly put to use where extreme conditions prevail and where safety of people and the trouble-free operation of plant and equipment must be ensured. It is made to resist the greatest heat and the highest pressure and it is unaffected by acids and is corrosion resistant. It provides high strength-to-weight ratio and can be processed to provide a combination of good surface quality, dimensional accuracy, good machinability, excellent micro-structure uniformity and high tensile properties. It well suited for such post-treatments as carburizing and heat treating.

EN 10216-5 Stainless Steel Pipes, EN 10216-5 Stainless Steel Welded Rectangular Pipes Manufacturers, EN 10216-5 Stainless Steel Seamless Pipe Suppliers, EN 10216-5 Stainless Steel Marine Exhaust Pipe Exporters EN 10216-5 Stainless Steel Polished Decorative Pipe Stockists.
