

# Hastelloy Flanges

Chhajer Steel & Alloys are aggressively venturing into exporting of our products to various countries. **Hastelloy C276 Flanges** are placed between two open flanges, which stop the flow through a pipe. Many times. They are suitable to use in various applications such as pollution control, chemical processing, waste treatment plants, and pulp and paper production. **ASTM B564 UNS N10276 Blind Flange** is usually used in pipe engineering, petrochemical, public services and water works. They are a solid disk used to block off a pipeline or to create a stop. It is used while adding another line onto an existing pipeline or when a new valve is being added.

**Alloy C276 Weld Neck Flanges** are resistant to the formation of grain boundary precipitates in the weld heat-affected zone, thus in an as welded condition it is suitable for most chemical process applications. **UNS N10276 Slip on Flanges** has a raised face and is manufactured to slip over the outside of pipe, long-tangent elbows, swages and reducers. They have excellent resistance to pitting, stress-corrosion cracking and oxidizing atmospheres up to 1900°F. It is ideal for low pressure applications since the strength when under internal pressure is about one third that of a weld neck flange. It provides poor resistance to vibration and shock and compared to weld neck flange it is easier to align. It is ideal for low pressure applications since the strength when under internal pressure is about one third that of a weld neck flange.

**ASTM B564 Hastelloy C276 Weld Neck Flanges** is joined by welding the pipe to the flange neck. It moves stress from the flange to the pipe rather. They are resistant to wet chloride gas, hypochlorite and chlorine dioxide solutions. It is frequently used for applications where high pressure is a factor, and reduces the stress concentration from the base of the hub. **Hastelloy C276 Forged Flanges** is used as a connection component for pipes, pumps, valves, and other equipment to form a pipework system. They have exceptional resistance to strong solutions of oxidizing salts, such as ferric and cupric chlorides.

**Hastelloy Flanges, Hastelloy Blind Flanges  
Manufacturers, Hastelloy Weld Neck Flanges Suppliers,  
Hastelloy Slip On Flanges Exporters Hastelloy High Hub  
Blind Flange Stockists.**

**Hastelloy Orifice Flanges in India, Hastelloy Pipe Flanges Manufacturers in India, Hastelloy Reduced Flanges Suppliers in India, Hastelloy Slip On Flanges Exporters in India, Hastelloy Lap Joint Flanges Stockists in India.**
