

Maraging Steel 350 Sheets & Plates

Chhajed Steel & Alloys are aggressively venturing into exporting of our products to various countries. **Maraging Steel 350 Plate** is a nickel-maraging alloy that is comparatively soft, but exceptionally tough. It can also be readily machined and formed to various specifications. In addition, the aging process of it raises the hardness to a level sufficient for many tooling applications. **Maraging 350 Sheet** is a nickel/cobalt steel alloy that is essentially carbon-free, it has other alloying elements such as molybdenum, aluminum and titanium. **350 Maraging Steel** material is used for numerous industrial applications, some of which include wind tunnel models, missile & rocket motor cases, landing gear components, high performance shafting, gears & fasteners, aerospace, extrusion tooling, die casting, etc.

This combination creates a superior maraging steel with a variety of features such as extremely tough, corrosion resistance & crack propagation, readily weldable, uniform, predictable shrinkage during heat treatment, easily nitride, easily weldable. **Maraging c350 Sheet** is a nickel/cobalt steel alloy that is essentially carbon-free, it has other alloying elements such as molybdenum, aluminum and titanium.
