

Nickel Alloy Pipes

Chhaged Steel & Alloys are aggressively venturing into exporting of our products to various countries. **Nickel Pipe** usually cold drawn and has less absolute roughness. It is a metal pipe that is made up of an alloy that has primarily nickel and other elements in its composition. These special steel pipes are used in power generation applications, pharmaceuticals, chemical equipment, sea water equipment, heat exchangers, condensers, pulp and paper industry, off shore oil and gas industries. The pure nickel pipes are actually commercially pure and contain about 99% nickel in the composition. The seamless nature makes the surface very even which makes the wall thickness uniform along the length of the pipes. There are alloyed nickel pipes and pure alloy pipes.

The **Ni Welded Pipes** are good for welding needs and nickel are very much corrosion resistant and lightweight in nature.. These properties of the element are used in various applications. The pure or High Nickel Alloy Seamless Pipe is therefore used only in applications that require this and cannot be replaced with anything else. These Polished Pipe can either be Pure Straight Pipes or in other shapes. The most used shape is the round pipe. But in addition to the Hot Finished Ni Alloy Round Pipe there are square, hexagonal and rectangular pipes as well.

Nickel Alloy Pipes, Nickel Alloy Welded Rectangular Pipes Manufacturers, Nickel Alloy Seamless Pipe Suppliers, Nickel Alloy Marine Exhaust Pipe Exporters Nickel Alloy Polished Decorative Pipe Stockist.

Nickel Alloy Square Pipe in India, Nickel Alloy Pipes Manufacturers in India, Nickel Alloy Rectangular Pipe Suppliers in India, Nickel Alloy Hydraulic Pipe Exporters in India, Nickel Alloy ERW Pipes Stockist in India.
