

## **P265NL EN 10216-4 Alloy Steel Pipes**

Chhaged Steel & Alloys are aggressively venturing into exporting of our products to various countries. Chhaged Steel & Alloy Pvt Ltd have several steel grades that are well suited for use in the construction of pipe lines for systems that have high pressure applications. Which is why, the materials selected in the manufacture of **PN-EN 10216-4 Non-alloy and alloy steel tubes** may have different minimum yield strength requirements. For instance, the minimum yield strength of steel grade p265nl rounds to about 265 N/mm<sup>2</sup>, whereas the minimum yield strength 215 N/mm<sup>2</sup> corresponds to grade en 10216-4 p215nl1.

These pipes are constructed using standard EN 10216-4, which covers both alloy as well as non alloy steels. Similar to most steels that are intended to be used in pressure based pipe line applications, the en 10216-4 p265nl is designated with the letters P and L. Because the material is either normalized or formed, manufacturers add the letter N to designate en p265nl grade 10216-4. In comparison to welded constructed tubes, the suitability for **EN 10216-4 Grade P265NL Alloy Steel Seamless Tubes** is much higher for several reasons such as lack of weld seam gives it better strength, makes it more durable and eliminates the cause for intergranular corrosion.

**P265NL EN 10216-4 Alloy Steel Pipes, P265NL EN 10216-4 Alloy Steel Welded Rectangular Pipes Manufacturers, P265NL EN 10216-4 Alloy Steel Seamless Pipe Suppliers, P265NL EN 10216-4 Alloy Steel Marine Exhaust Pipe Exporters P265NL EN 10216-4 Alloy Steel Polished Decorative Pipe Stockists.**

**P265NL EN 10216-4 Alloy Steel Square Pipe in India, P265NL EN 10216-4 Alloy Steel Pipes Manufacturers in India, P265NL EN 10216-4 Alloy Steel Rectangular Pipe Suppliers in India, P265NL EN 10216-4 Alloy Steel Hydraulic Pipe Exporters in India, P265NL EN 10216-4 Alloy Steel ERW Pipes Stockists in India.**
