Chhaged Steel & Alloys are aggressively venturing into exporting of our products to various countries. Chhaged Steel & Alloy Pvt Ltd is the manufacturer of S35512h tubes and supplies products around the world. **Carbon Steel S355J2H seamless pipes and tubes**, also known as mild steel pipes and tubes. Carbon Steel Seamless Pipes and tubes have carbon content up to 0.22% with the manganese into it to some extent for good forming properties and desired shapes. The overall chemical composition is carbon 0.22%, Si up to 0.55%, manganese up to 0.03%, and sulfur for about 0.03% as maximum. In comparison to low carbon steel pipes, S35512H has good toughness and ductility. S35512H carbon steel pipe can increase its surface toughness much because of the carburizing effects.

S35512H is high-quality carbon steel. Hot finish EN 10210 has the structural shapes as rectangular hollow sections are the pipes that are trustworthy to be usually used across critical structural applications. Carbon Steel S35512H Tube are available in various forms, sizes and thicknesses and customized specifications to meet the requirements of our valuable clients. **Carbon Steel S35512H Tube** has a wide range of properties to offer, such as high resistance to crevice and pitting corrosion. Carbon Steel grade EN 10210 Tubes provide superior surface finish, reasonable prices, long-lasting service life, etc.
