

Stainless Steel Pipe

Chhajed Steel & Alloys are aggressively venturing into exporting of our products to various countries. **Stainless Steel Pipes** improves its longevity along with enhancing several of its properties such as corrosion resistance, increased tensile strength & durability. Therefore various grade **Stainless Steel Welded Pipes** such as alloys 304, 316, 310 etc are used in highly demanding applications involving industries like water, marine, pulp and paper industry, chemical processing, oil and gas, petrochemicals etc. When alloy grade 316 is used in the manufacture of **ASTM A312 Stainless Steel boiler pipes**, the resultant pipe can be used in not only high temperature applications, but also general corrosive service.

This is because grade **316 electropolished stainless steel pipes** has improved resistance to corrosion and is often referred to as a marine grade stainless steel alloy. On the other hand, those applications which are less demanding can use alloy grade 304, which although is known to have advantageous properties, is not as good at resisting corrosion in comparison to its austenitic counterpart grade 316 Stainless Steel Pipe.

304 Stainless Steel Pipes, Stainless Steel 304L Welded Rectangular Pipes Manufacturers, Stainless Steel 316 Seamless Pipe Suppliers, 316L Stainless Steel Marine Exhaust Pipe Exporters Stainless Steel Polished Decorative Pipe Stockist.

Stainless Steel 410 Square Pipe in India, Stainless Steel 420 Pipes Manufacturers in India, Stainless Steel 430 Rectangular Pipe Suppliers in India, Stainless Steel 317 Hydraulic Pipe Exporters in India, Stainless Steel 317L ERW Pipes Stockist in India.
