

Stainless Steel Sheets & Plates

Chhajed Steel & Alloys are aggressively venturing into exporting of our products to various countries. **Stainless steel sheet** is primarily selected for its resistance to corrosion, longevity, and formability. They are uses of stainless steel sheets/plate include construction, food service applications, transportation, chemical, marine, and textile industries. The **stainless steel coil** is used in the construction and automotive industry for making goods with decorative coatings, they are made from alloys of silicon, nickel, carbon, manganese, and nitrogen. It is wide coils which are typically made at around 1250mm. for example, nitrogen improves tensile properties like ductility, and also Nickel is added to improve its flexibility. Stainless Steel rod grade includes 301, 302, 304, 310, 316, 321/321H, 347/347H Manufacturer.

The **stainless steel strip** is manufactured from a hot rolled strip that has been preserved, and its grade includes 301, 302, 304, 310, 316, 321/321H, 347/347H Manufacturer. The coil is been reduced by a single stand cold roll steel mill straight away consisting of several single stands in a series. The cold rolling the strip is reduced to approximately final thickness. The final product contains cold-rolled steel that has been cut into strips with specific widths and coiled for delivery. Stainless steel perforated sheet useful for decorative and structural applications, its been manually or mechanically stamped or punched using CNC technology. Its architecture and design, including facades, stairs, balustrades, and screens, and its characteristics allow for creativity with light, sound, and visual depth.
