

2507 Super Duplex Steel Pipes

Chhaged Steel & Alloys are aggressively venturing into exporting of our products to various countries. **Super Duplex 2507 Pipe** is a super duplex material made metal pipe. The super duplex is an alloy of chromium, molybdenum and nickel. The material has very high corrosion resistance properties and is resistant to pitting corrosion, crevice corrosion and uniform corrosion as well. The **Alloy 2507 Seamless Pipes** are produced through a method called the cold drawing. Cold drawn pipes are seamless or have smooth surfaces. Super Duplex is an austenitic-ferritic iron chromium – nickel alloy with molybdenum addition. It has good resistance to pitting and a very good tensile strength and high resistance to stress corrosion cracking at moderate temperatures, compared to that of conventional austenitic stainless steels.

Super duplex material properties make the super duplex specifically applicable in different applications. The piping systems in desalination plants, fuel systems, chemical industries and food processing industries use the super duplex grades. There are sheets, plates, pipes, fittings and other accessories made out of this material. The **Super duplex steel** suppliers sell all the different products of super duplex according to the need of the customers.

2507 Super Duplex Steel Pipes, 2507 Super Duplex Steel Welded Rectangular Pipes Manufacturers, 2507 Super Duplex Steel Seamless Pipe Suppliers, 2507 Super Duplex Steel Marine Exhaust Pipe Exporters 2507 Super Duplex Steel Polished Decorative Pipe Stockist.

2507 Super Duplex Steel Square Pipe in India, 2507 Super Duplex Steel Pipes Manufacturers in India, 2507 Super Duplex Steel Rectangular Pipe Suppliers in India, 2507 Super Duplex Steel Hydraulic Pipe Exporters in India, 2507 Super Duplex Steel ERW Pipes Stockist in India.
