

Titanium Alloy Round Bars

Chhaged Steel & Alloys are aggressively venturing into exporting of our products to various countries.

Titanium Round Bar is a light in weight and has high corrosion resistance and ability to resist extreme temperatures and useful in various industrial applications. It is a cylindrical metal bar stock which has many commercial and industrial applications. They are available in a wide range of sizes, grades and specifications.

Titanium Flat Bar is used in a wide range of architectural and structural applications, they are long and rectangular-shaped metal bars. Titanium flat bar is important as a combining agent with many metals including aluminum, iron and molybdenum and they are strong as steel but much less density.

Titanium Rectangular Bar possesses tensile strengths from 30,000 psi to 200,000 psi, which is equivalent to the strength of other alloy steel. Titanium square bar common applications include ornamental iron work and protective barriers on windows, they are widely used in many industries for general assembly or manufacturing.

This melting point is approximately 400°F i.e., which is above the melting point of steel. Titanium rectangular bar are used for general repairs of plant equipment and railings. **Titanium Hollow Bar** has combination of thermal expansion which is lower than steels and less than half that of aluminum, they are round in shape and it looks like a pipe or a tube.

Titanium Alloy Round Bars, Titanium Alloy Round Bars Manufacturers, Titanium Alloy Round Bars Suppliers, Titanium Alloy Round Bars Exporters Titanium Stockist.

Titanium Alloy Round Bars in India, Titanium Alloy Round Bars Manufacturers in India, Titanium Alloy Round Bars Suppliers in India, Titanium Alloy Round Bars Exporters in India, Titanium Stockist in India.
